

I fell that the FCC should not implement
any proposal that would lessen
Indiana's Telephone Privacy law
protections.

Indiana's Telephone Privacy law

has improved my time at home by my life not being interrupted by ridiculous
sales calls. If I want to buy something, I will go looking for it. In this
busy world or work, school and homework, we do not have time to answer
unnecessary phone calls.

I used to have to pay additional money each month to have my number non listed
so the telemarketers could not get my phone number. I now have a law that
protects MY privacy.
